Evaluation and Simplification

SIMPLIFYING THE CLOUD TO MANAGE COSTS AND ENSURE MAXIMUM RETURN ON TECHNOLOGY INVESTMENTS

If your organization's business plan includes moving to the cloud or a hosting environment and you're struggling with the cost, coordination and resources, you might want to start thinking of a "business plan" for the migration itself.

Aprio's best practice T-Minus-14 Runbook Approach and templates can help you organize and align your migration targets with business requirements. Any data or application migration requires defined strategies, methodologies, project planning and success metrics to ensure efficient and seamless execution. That is what our T-Minus-14 method can offer your planning committee.

Aprio's Business Technology Consulting Services group works with clients to create the business case for technology transformations and design solutions that simplify deployment processes and help manage costs. Our team applies proven methodologies that enable you to:

Evaluate the landscape

Evaluate strategies and operations before deployment to understand costs and benefits.

State your case

Develop a business case to execute wave groups when migrating to data center hosting facilities, cloud environments and managed service providers.

Control costs

Align data center costs, service plans and cloud contracts with business activities for cost transparency.

Define migration targets

Using our discovery assessment method and templates, design a step-by-step gating process to define targets and dependencies to create a details migration schedule.

Is your technology designed to simplify management and support profitable growth? Technology investments should support business goals across the enterprise.

Our proven methodology and templates for delivering applications, environments and IT services to the Cloud

Moving from concerns to control

If your organization is struggling to understand and monitor its technology investments and wondering where to turn, we can help. Aprio's Business Technology consultants serve as independent, objective advisors to guide companies through the most challenging transformations. Our services have been designed to help companies that are dealing with these common concerns:

- Approaching a cloud migration with no baseline for IT, services or support
- Requiring a business plan for a cloud strategy and migration ROI
- Resolving M&A integration challenges - pre-merger and post-merger
- Requiring cloud costs to integrate to service catalog via TBM reporting
- Protecting data outside of the cloud environment
- Requiring periodic resource/outsourcing options for executing basic move groups

Accountability and confidence

Aprio's Business Technology Consulting Services team has developed proven frameworks and methodologies to help evaluate and simplify the most challenging technology transformations. The rigor of our CPA heritage ensures that our services help your organization link IT CapEx and OpEx spend to business services in a manner that fosters accountability and confidence in planning and execution.
