

Aprio[®] + cardconnect.

Aprio has partnered with CardConnect to provide custom, cost effective payment solutions for members that are already accepting or looking to accept credit cards, as well as ACH payments.

Aprio clients can expect:

Easy Agreement

No upfront fees, no contracts. Just savings.

Better Pricing

CardConnect manages interchange and optimizes rates so you'll receive the lowest rate possible for every transaction. We have built our technology to include Level II and Level III data with every transaction.

Exclusive rates ensure you save between 10 and 40% on processing fees and transparent pricing means you're never left wondering what you're paying for each month.

Omni-Channel Acceptance

Accept payments via a virtual terminal, countertop terminal, point-of-sale system, mobile app/device and eCommerce plugins.

Security You Can Count On

CardConnect's patented tokenization and PCI-certified point-to-point encryption creates peace of mind when accepting all card types paying for each month.

Faster Funding

Funds are automatically deposited into your bank account the next business day, so you no longer have to wait for checks to clear.

Real-Time Reporting

Get a high level overview of your payments in real-time, or drill into each transaction to perform refunds, voids or resend and reprint receipts.

We understand running a business can be stressful, which is why we do all the heavy lifting when it comes to your payment processing needs, so you can focus on your operations.
