Aprio's experienced Restructuring and Turnaround Advisory Services team can assist creditors with understanding debtors' business viability while assessing liquidity requirements, evaluating business plans, executing strategic divestiture processes, capital investments and understanding enterprise value.

Aprio's services include:

Assessing short-term and long-term liquidity requirements and business viability

Assisting creditors with analysis and monitoring of debtors' historical, current and projected financial positions and results while considering:

Forecasting and working capital management - Working capital is paramount during business disruptions. Get strategies to drive improvement beyond the negotiation of payment terms and the tracking of standard Days Sales Outstanding, Days Inventory Outstanding and Days Payable Outstanding.

Income statement impact - Understand and assess one-time revenue opportunities and non-recurring costs. Consider strategies and related execution to realign and reduce cost structure.

Investments - Defer capital investment/maintenance and idle cash-burning operations.

Executing strategic divestiture process and consideration of capital investments

Aprio assists creditors with the carve out of non-core assets and entities by assessing financial reporting and accounting implications. We partner with finance, accounting, external resources and deal team members to deliver independent carve-out advice on divestiture and capital raise transactions. We execute an expediated process in order to get the deal signed and closed. Accounts payable management - Understanding and managing vendor payment terms and vendor negotiations, facility costs and payroll and benefit obligations.

Aprio provides actionable advice from experienced restructuring and turnaround professionals to maximize unsecured and secured creditors' recoveries.
